Profile

A passionate and skilled full-stack web developer with a strong foundation in both front-end and back-end development. Experienced in developing websites using the Laravel Framework. Adept at working independently and in small groups, with a solid background in computer science and artificial intelligence. Currently advancing my skills as a trainee at ITI in the BHP Full stack track.

Internships

Full Stack Web Development using PHP

May 2024 – Sep 2024

Information Technology Institute (ITI), 4-Month Program Intensive Code Camp (ICC),
Ministry of Communication and Information Technology (MCIT).
Menoufia Branch

Education

Bachelor of Computer Science and Artificial Intelligence, Benha University

Graduated: 2023

Grade: Very Good

Graduate Project: E-commerce website (Excellent)

Work Experience

Freelance Web Developer

Sep 2023

- Developed and maintained websites using Laravel Framework, ensuring responsive design and functionality.
- Collaborated with small groups to deliver tailored web solutions for clients.
- Managed both front-end and back-end development tasks, optimizing site performance and user experience

Projects

E-commerce (B2B): This project encourages wholesale sales, but not from vendor to vendor only

- We have limited the number of people who are able to buy the product, meaning we gather a group of people to buy one product
- Technology Stack: HTML, CSS, JavaScript, mysql,PHP,laravel8

E-commerce (B2c): It is an exhibition to display some of the products of a specific place. The buyer selects the products and then pays

- Technology Stack: HTML, CSS, JavaScript, mysql,PHP

Coffee shop : It is a cafeteria system. This system facilitates the use of the users of this project

- All products from the cafeteria were displayed to the user
- An Admin system has been created in which all existing processes are present
- Technology Stack: HTML, CSS, JavaScript,mysql,php

HR System: system that calculates employees' absence and attendance and calculates their salary

- This system records employee attendance times every day via an Excel sheet
- Based on this, the salary of each employee is calculated and official and weekly vacations are also recorded
- Technology Stack: HTML, CSS, JavaScript, angular, angular martial,scss,mysql,laravel11
